

**BOON
DRILLING
TECHNOLOGIES**

FEATURES

- Simple and Robust design (No moving parts)
- No ID Restriction
- Fully customizable connection, dimensions and burst pressures
- One way activation. Will not open from the annulus.
- 20% destructive testing during manufacturing ensures quality and consistency of the inserts. Batch must be within 2% of burst pressure to pass.
- Tried and tested. Insert has been used in 4000+ wells without failure.

DRILLING DRAIN PORT

PORT

NOM. BURST NUMBER

The DDP can be easily configured for a chosen activation pressure. **Nominal burst number engraved on port represents burst pressure in MPa x 10**, e.g. port with nom. burst number 482 represents burst pressure of 48.2 MPa (7000 psi).

BENEFITS

- Can be configured into any BHA
- Re-establish circulation above BHA in case of pack off etc.
- Maintain Well control
- No Wet trips
- No Perforating
- Assist in Fishing operations should they be required
